

## GOLF CLUB MAKES GOOD START ON THE 1930 SEASON

Dr. A. G. Scott Elected President and Dr. Keith Captain

The Bassano Golf Club launched its season's activities with the holding of the annual meeting last Friday evening, April 11. The meeting took place in the office of 2101 McLean, K. C.

Following is the list of officers elected for the 1930 season:

President - Dr. A. G. Scott.  
Vice Pres. - Dr. W. F. Keith.  
Sec. Treas. - D. C. Patton.  
Executive - Robt. McLean, A. Stewart, C. H. McMillan, Mrs. A. Stewart, Mrs. Florence.  
Captain - Dr. Keith.  
Auditor - E. A. Beck.  
Greens Committee - Dr. Scott, Robt. McLean, C. H. McMillan, and Dr. Keith.

The membership fees this year will be \$40 for men, \$25 for ladies, and \$10 for school boys up to eighteen years of age.

The club is in a healthy financial condition, having \$141 in the treasury.

Kat. native improvement is planned for the course this year, and it is expected the links will be the best in the district. The club's golfers are to be improved, the fairways smoothed up, and three holes are to be changed to make the course longer and otherwise improve it. These holes are Nos. 4, 6, and 7. The fee for No. 8 hole will be moved back to make this a longer hole.

More enthusiasm is evident in golf this year than last. Fifteen players attended the annual meeting and everyone appeared confident that a greater number would play the game this year. A considerable increase in membership is expected among the ladies.

## Hussar News

HUSSAR, April 16—All stores excepting the ice cream parlors were closed on good Friday.

There will be a joint meeting of the Hussar Board of Trade and curling club on Thursday evening at A. A. Cliffridge's store.

The W. L. will meet at the home of Mrs. A. Jensen on Thursday, April 24th.

The Sunday school will put on a very special Easter program in the Community Hall at 2:00 p.m.

The rain and snow in this community on Monday were most acceptable.

Mrs. J. Hought is quite ill in the Bassano Hospital. Her sons, Raymond and Louis, and her daughter, Mrs. K. Schaffer, were called to Bassano on Monday to be with her, but had to return to Regina on improvement in her condition.

Mrs. and Mrs. A. A. Cliffridge were Bassano visitors on Sunday.

Mr. and Mrs. T. A. Hawkshaw motored to Bassano the first of the week.

Mrs. A. J. Kedzie and Madge and Kibb were in Bassano on Sunday.

Mrs. J. L. Mountgarny was a Calgary visitor on Friday.

Bruce C. Bell spent the week-end at home, then went to do practice teaching at the Elementary school.

Mrs. C. T. Armstrong returned on Thursday from a visit with friends in Calgary.

School closed on Thursday afternoon for the Easter holidays. As the teachers will be attending the teachers' convention in Calgary, there will be no school till April 28.

The Ladies' Aid held a very successful tea and sale of home cooking on Saturday afternoon. The proceeds were about \$25.00.

Anna Margie Percheron married on Wednesday at the Edmonton house last week.

## Rainfall Benefits Crop Conditions; Seeding 60 per cent Completed

### Nearly Three-quarters Inch Rain Brightens Crop Outlook—Early Sown Wheat Showing Above Ground

The Bassano agricultural area received its share of the rainfall that visited the provinces of Alberta and Saskatchewan early this week, and farmers here are cheered by the improved crop prospects.

Nearly three quarters of an inch of rain fell during the twenty four hours that the rain continued, and grain fields that were becoming dry are now supplied with enough moisture to give the wheat a good start.

The rain gauge readings made by C.P.R. D.N.R. officials at Bassano, the dam, Comstock, and Glen, are as follows:

Bassano	..... 54 inch
Comstock	..... 71 inch
Glen	..... 55 inch
Comstock	..... 60 inch

Crop conditions here are now fairly good. Seeding operations which were halted by the rain have been resumed, and the moisture has put the seed bed in good condition.

Bright sunshine and warm weather Wednesday and Thursday provided ideal growing conditions, and the young grain should grow rapidly.

Seeding is now about sixty per cent completed around Bassano, and the balance of the crop is being seeded as quickly as possible.

Some of the early sown wheat crops are already showing rows of green shoots above the ground. The rain and warm weather are bringing these crops along in great shape.

The wheat acreage around Bassano shows a considerable increase over last year. Early estimates placed the increase at about 5 or 6 per cent, but later figures would indicate that the increase is about 20 per cent over last year.

## 1000 TREES ARE TO BE PLANTED NEXT TUESDAY

### Voluntary Workers Will Aid in Town Beautification

Continuing the program of putting in more trees every year, the Bassano Board of Trade and the Town Council will this spring add another one thousand trees to the thousands that are already growing on the streets of the town.

Next Tuesday morning, April 22, is the date of the tree planting campaign, and the town organizations sponsoring the plan are now making preparations for planting the trees. Voluntary workers are called for, and every man who can is asked to turn out and do his share of the good work.

An effort was made to get two thousand trees this spring, but it is possible to get only one thousand. These are coming from the C.P.R. D.N.R. at Brooks. The trees will be planted in a long row at the north end of town, and some will be used for replacements on the streets where trees have died.

## Bearcats Join The Bow Valley League

### Local Baseball Club Re-Organized for the 1930 Season

The Bassano Bearcats made plans for the 1930 baseball season at the annual meeting held in Hrey Smith's office last Friday evening, April 11.

The following officers were elected:

Pres. - M. R. Milroy.  
Vice Pres. - L. Y. Hraue.  
Sec. Treas. - Dr. B. E. Bellow.  
Manager - L. Hraue.  
Captain - Ralph Burrows.  
Executive - Robt. McLean, W. A. Brodie, A. P. Pierson, L. Newby, Dr. A. G. Scott, and A. R. Maurer.

The meeting was well attended, and fans and players were enthusiastic. Indications point to a fine season of baseball ahead.

The Bearcats should field a fairly strong team this year. There are a good number of players who will likely want to get in the game again this year including Ralph and Royal Burrows, A. Marquardt, R. Marquardt, Jacky Hraue, George LePage, Art Simpson, Ed Hraue, Frank King, Wm. Hraue, L. Hraue, and others.

### In Bow Valley League

Bassano will be in the Bow Valley League again this year. Four teams are in the league; they are: Arrowwood, Queenstown, Meadowbrook, and Bassano. The league was organized at a meeting in Arrowwood last Saturday. Mr. Sloan, of Queenstown, was elected president, and Ralph Burrows secretary treasurer.

The league schedule has not yet been drawn up, but the first game will probably be played about May 11 or 12.

## FORMER EDITOR OF THE BASSANO MAIL IS DEAD

Percy W. Stone Died in Calgary Tuesday, April 15—Was 54 Years of Age

Percy W. Stone is dead. The night editor of the Calgary Herald and erstwhile editor of The Bassano Mail died in Calgary at 2:35 o'clock Tuesday afternoon, April 15.

Mr. Stone was taken ill very suddenly. He worked at his desk in the editorial room of the Herald to within two days of his death.

The gray haired newspaper veteran was 54 years of age, and had followed the newspaper game for thirty years.

Mr. Stone became editor of The Bassano Mail in the early part of the year 1915, succeeding H. L. Kline. He severed connections with The Mail in June, 1917, and later became associated with The Calgary Herald, of which paper he was editor for more than ten years.

During his two years as editor of The Mail Stone was an enthusiastic worker for the agricultural, commercial, and social development of the community. He yielded his pen with good effect in the support of worthy cause or the condemnation of wrong or injustice.

He made a number of enemies, but he also made many fast friends, and as editor of the paper he tried to deal fairly with all people and with all issues.

The present editor of The Mail had the good fortune to know Stone in the days when he edited this weekly. I knew him as a friend and an opponent, for in the winter of 1915-16 I joined The Mail staff as "printer's devil."

Stone taught me how to run the press and to stick type, and do the many arduous and difficult jobs in connection with the publishing of a newspaper. He was a good boss, a square shooter, and always a word of friendly advice.

Stone was a thinker, a builder, and a man of vision. He saw the great possibilities of agricultural development in the prairie north-west. He was a lover of nature, and appreciated the beauty and value of trees. He planted the three shade trees which now rear their heads high above the roof of The Mail office and cast a friendly shade beneath their generous branches. Stone planned a whole row of trees, running right back to the lane. These three are the only survivors, and we like to look on them as a monument to one of Bassano's pioneer tree planters.

It was a pleasure to know as a friend.

## Amateur Play Will Soon Be Ready for Public Showing

### "Nothing But The Truth" is a Funny Tale That Will Please Audience

Theatre-goers who are anxious to see "Nothing But The Truth" will have to wait a couple of weeks more before the amateur production is ready for public presentation. The Bassano Players, who are putting on this screaming comedy, have been busy preparing and rehearsing their scenes for the past month, and are polishing the play to make their production as near perfect as possible before presenting it to the public.

No date has been set for the first appearance of the play, but it will probably be given some time early next month.

"Nothing But The Truth" is a comedy in three acts, and is bristling with humor, mirth-provoking situations, and clean fun.

## RESULTS OF EASTER TESTS IN BASSANO PUBLIC SCHOOL

### The Problem Of Unemployment

The nations of the world, and more especially those of the white race, and of these the most highly industrialized, are confronted with a common problem which is becoming increasingly acute. It is the problem of unemployment. In the past, the nations of the world have been able to absorb the surplus of people, able willing and competent to work but who are unable to secure it.

The present situation is a paradox. No less competent an authority than the President of the United States, in a recent address to Congress, has declared that the cause of unemployment is not a lack of demand for labor, but a lack of demand for labor in the right places. The result is that the surplus of people, able willing and competent to work but who are unable to secure it, is now being absorbed in the right places.

In other words, the unemployed are not being absorbed in the right places. The result is that the surplus of people, able willing and competent to work but who are unable to secure it, is now being absorbed in the right places.

The problem of unemployment has been recognized since the war as a serious one in Great Britain, and greater publicity has been given to the problem in Canada than in other countries. Largely because of the fact that the unemployment problem in Canada is more acute than in other countries, the Government has been able to obtain a more accurate picture of the actual number out of work.

### British Navy Seen Changes

Admiral Sir Hugh Watson Retires After Serving For 45 Years  
Admiral Sir Hugh Watson, who has served in the royal navy for 45 years, and has been seen in active-duty operations off East Africa, the China and Mediterranean stations, and served throughout the World War, is retiring at his own request. He is 58 years of age. He was vice-admiral, commanding the reserve fleet 1926-28.

Hear Admiral H. E. Grace, son of the famous cricketer, has been promoted vice-admiral, and placed on the retired list. He is 54 years of age. During the war, Vice-Admiral Grace, then a captain, commanded the Grafton, Yarmouth, Hibernia and the new Vendictive.

The admiralty recently announced the promotion of Vice-Admiral Sir Ernie Chatfield, commander-in-chief of the Atlantic fleet, to admiral. His appointment to command the Mediterranean fleet was announced recently.

### A SPRING TONIC AN AID TO HEALTH

You Can Lay the Foundation Of Good Health Now By Bringing Up Your Blood and Strengthening Your Nerves Through the Use Of Dr. Williams' Pink Pills.

The good old fashion of taking a tonic in the spring, like most of the old-fashioned remedies, is based upon sound common sense and good medical practice. Why is it always a trying time for those who are not in robust health. Many men, women and children go through the winter on nervous strength they have stored up during the sunny summer months and grow increasingly pale and languid as the spring days draw near. A tonic, which cleanses the blood and nerves at this time will do much for such people by putting color in the cheeks and banishing that tired feeling that comes over the system at this season of the year.

It is impossible to be energetic if your blood is thin and weak, or if your nerves are frayed or shattered. You cannot get on your feet if you do not get refreshing sleep at night. If you are tired, you need a tonic at this time to add to your strength, as well as to save you from suffering later on. And in all the public health records, it is a fact that the people who are the strongest and best of their kind are those who have taken Dr. Williams' Pink Pills.

These pills tone and enrich the blood and strengthen the nerves through every portion of the body. They are a tonic for the system, and they are a tonic for the nerves. They are a tonic for the system, and they are a tonic for the nerves.

### Completes Long Air Journey

Bishop Geddes Makes Trip From Alkavik To Edmonton  
Covering the two thousand miles from Alkavik, on the Arctic coast, to Edmonton, in 17 hours, of actual flying time, His Lordship Bishop W. A. R. Geddes, completed a trip March 30. A pilot, assisted a trip March 30, which would have taken ten weeks of ordinary winter travel. In open water, the journey by steamer would have lasted three weeks.

The bishop, accompanied by Mrs. Geddes, left Alkavik in a Commercial Airways plane, piloted by Capt. W. R. (Wop) May. It was 30 below zero when the machine left Alkavik. This was ordinary winter weather at that point, although a bad storm was expected the week before.

On the second day, Fort Simpson, Hay River, and Fort Resolution were reached, where the second night was spent at Fort Chipewyan. Pilot May was on to Fort McMurray and Pilot Gledes, whom he brought on to Edmonton.

On the second day, Fort Simpson, Hay River, and Fort Resolution were reached, where the second night was spent at Fort Chipewyan. Pilot May was on to Fort McMurray and Pilot Gledes, whom he brought on to Edmonton.

On the second day, Fort Simpson, Hay River, and Fort Resolution were reached, where the second night was spent at Fort Chipewyan. Pilot May was on to Fort McMurray and Pilot Gledes, whom he brought on to Edmonton.

### British Headmasters Are Visiting Canada

Means Important Step Towards Empire Solidarity Says Official  
The visit of the British public school headmasters is regarded by educational authorities throughout Canada as an important step toward demonstrating a sense of solidarity and good will among the British Empire. The headmasters, who are visiting Canada, are being met by the Dominion and completed arrangements for the tour. Mr. Lindsay left the city for Quebec and Saint John, N.B., where the 15 headmasters arrived on the Canadian Pacific liner "Duchess of Bedford".

Nine universities will be visited according to Mr. Lindsay. These include Dalhousie, McGill, Kingston, Toronto, University of Alberta, University of Manitoba, Saskatchewan, Alberta and British Columbia and Laval University, Quebec.

### Stops a Cough In One Night

A cough may be Catarrh with a dry itching in the throat. It may be accompanied by partial stoppage of the nostrils and shortness of breath. It is caused by a Catarrh of the throat, and every cough tears and hurts.

Coughs have a hundred different causes, yours may be due to any of the following:

Inflamed Throat  
Bronchitis  
Pneumonia  
Inflammation of the Lungs  
Catarrh of the Larynx  
Catarrh of the Trachea  
Catarrh of the Bronchi  
Catarrh of the Pleura  
Catarrh of the Pericardium  
Catarrh of the Endocardium  
Catarrh of the Myocardium  
Catarrh of the Epicardium  
Catarrh of the Pericardium  
Catarrh of the Endocardium  
Catarrh of the Myocardium  
Catarrh of the Epicardium

One remedy upon which physicians are relying today is Catarrhose. It removes the cause of the cough, doesn't smother it.

It simply wonderful to think how quickly a bad throat or catarrh can be helped with Catarrhose. Its balsamic vapor is carried along with the breath to the innermost recesses of the lungs, bronchial tubes and chest, making it impossible for the germ of Catarrh to live. Thus the cough is cured at its source.

REMEMBER THIS, you breathe through your nose. Catarrhose, \$1.00, and lasts two months; smaller sizes, 25c and 50c. Beware of imitations and insist on "CATARRH-ZONE".

REMEMBER THIS, you breathe through your nose. Catarrhose, \$1.00, and lasts two months; smaller sizes, 25c and 50c. Beware of imitations and insist on "CATARRH-ZONE".

## Five Great Naval Powers Of The World Have Reached An Agreement

London, Eng.—After many weeks of negotiation the five great navy powers of the world have reached an agreement. There will be a five-power naval limitation agreement and three powers—the United States, Great Britain and Japan—will sign certain additional clauses to which the two Latin nations do not at this time, feel they are able to subscribe.

There will be the two understandings, the partial agreement of the five and the complete accord of the three.

Political discussions regarding a security pact and definition of the guarantees provided by article 16 of the League of Nations covenant will be left over for Geneva and the league.

The main provisions of the proposed major pact are:

1. A five-power agreement on the extension of the Washington capital ship holiday, until 1936. This means an extension of five years.
2. A five-power agreement which would bring within the scope of the Washington treaty, limitations on aircraft carriers under the 10,000-ton mark. The Washington limitations on this category applied only to those over that tonnage.
3. A treaty among the five powers in the direction of the humanization of submarine warfare.
4. A treaty among the five powers covering special exempt vessels not covered by the Washington treaty.
5. A five-power treaty on methods of limitation. This covers the old problem so prominent at Geneva of the limitation by jump tonnage, as against limitation by categories.

The foregoing provisions will be signed by all the powers attending the conference.

The three-power agreement of Great Britain, the United States and Japan goes further. It limits not only the battleships and aircraft carriers, but it limits all categories of warships. It covers cruisers, in the matter of which the United States and Great Britain differed so radically at the Geneva tri-parite conference in 1927.

It is understood that the following limitations of tonnage will apply:

Cruisers carrying eight-inch guns: British Empire, 14,600 tons; United States, 15,000 tons; Japan, 10,000 tons.

Six-inch gun cruisers: British Empire, 10,200 tons; United States, 11,000 tons; Japan, 10,000 tons.

Destroyers: British Empire, 1,500 tons; United States, 1,500 tons; Japan, 1,000 tons.

Submarines: British, the United States and Japan have 52,700 tons each.

The only naval restriction affecting France is that in respect to the extension of the Washington battle ship holiday and also that concerning aircraft carriers. France, however, never built up to the limit in battleships allowed her by the Washington treaty.

### Bill Given Hoist

Legislation On Resources Agreement Will Stand Until After Easter recess.

Ottawa. Legislation to ratify natural resources agreements with the four western provinces will not be proceeded with until the first of next month.

A misunderstanding was the cause of an unnecessary delay.

Hon. Charles Stewart, Minister of the Interior, told the House of Commons that the four bills could not be proceeded with until after the Easter recess as he was not prepared to complete ratification at this time.

Drafts of the agreements have been returned by the governments of Saskatchewan, Manitoba, Alberta and British Columbia.

### Alberta Boy Wins Trophy

Captures Prince Of Wales Prize At Edmonton show.

Edmonton, Alberta. Clifton Crum, of Cive, Alberta, captured the Prince of Wales' challenge trophy for the best finished beef calf in the children's classes at the second night of the Edmonton spring show. With a white shorthorn heifer he had captured the Association cup for the best fat heifer calf, and then won over the cup winning calf in the steer class shown by Barbara Chessor, of Lacombe.

Earl Brown, of Brandon, Man., won the children's livestock judging competition.

### Peace Memorial Park

Money To Be Raised By R.C. School Children Donating Bric-a-Brac Pieces

Vancouver.—Money subscribed in ten-cent pieces by the school children of British Columbia will be devoted to laying out of a peace memorial park on the Canadian side of the Peace Arch at the international boundary between British Columbia and the state of Washington. It was decided at a meeting here of the International Peace Memorial Association.

The United States end of the Pacific highway is being diverted to the Peace Arch, and the Department of Public Works, at Victoria, is changing the Pacific highway from its present position to the right-of-way to the arch.

The work of the International Peace Memorial Association will be to establish a magnificent park area on the Surrey side of the line. The Dominion Government has agreed to turn over certain lands there for a park.

## WAR VETERANS ALLOWANCE ACT IS ENDORSED

Ottawa. Broadly speaking, the ex-soldiers' organizations of Canada endorse the War Veterans' Allowance Act, which provides for granting to unemployed ex-service men a certain monthly allowance at the age of 60, said Col. J. L. LaFleche, president of the Canadian Legion, to the special parliamentary committee on returned soldiers' problems. The bill provides for granting the "burned out" veteran, who is wholly unemployed, eligible for the grant before he has reached 60 years of age.

What was anticipated as a contentious matter was the clause which established a pension committee, under direction of the minister, to control the operation of the act.

The minister of pensions, Dr. J. H. King, informed the committee that on this departmental body the veterans would have an honorary member and also honorary members on the various district boards.

Col. LaFleche, speaking on behalf of the veterans, declared that this new provision would be satisfactory inasmuch as it would enable the ex-soldier organizations to keep in touch with the decisions of the committee. He said that the veterans desired it to be made clear that the bill should not have any bearing on the provisions of the Pensions Act.

### Shipped As Waste Paper

Large Liquor Cargo Seized At Niagara By U.S. Customs Officials

Niagara Falls, Ont. A carload of waste paper, billed from Port Vaux, aroused the suspicions of United States customs officials across the Niagara River. Working on the theory that waste paper is not shipped such distances, the officials opened the car and discovered more than 1,000 cases of rare wines and cordials, hidden under the layer of waste.

The liquor was dumped into the river from the lower bridge to the great delight of boat owners. Word quickly spread that liquor was being thrown over and many persons rowed down under the bridge and salvaged bottles which had not broken.

### Distinguished Visitors

Hon. Lord Dundas Irgay, seventh son of the seventh Duke of Northumberland, and president of the Board of Education in the Baldwin ministry, accompanied by Lady Percy, is shown here on board S.S. Duchess of Athol, at Saint John recently. The distinguished couple are on a visit to Canada and the United States, where Lord Percy will inaugurate a series of lectures at Yale University on Anglo-American relations.

### Visits Birthplace

Mr. Almee Temple McPherson, noted evangelist, who, heading his pilgrimage to the Holy Land, stopped at London, Ont., her birthplace, to mark a battle showing how she would determine his contentions of the day.

### Miners Will Not Strike

Leithridge Men Decide To Apply For Board Of Conciliation

Leithridge, Alberta. There will be no strike in the Leithridge minefield. The result of a vote announced at the meeting of the miners' union for conciliation and 142 for strike action.

The miners will now apply for a board of conciliation under the Leithridge Act to consider their demands, which include a small increase in wages and recognition of the Mine Workers' Union of Canada.

### Canada's Relations With Russia

Are Very Similar To Those With Other Countries

Ottawa. Diplomatic relations between Canada and Russia are similar to those existing between the Dominion and other countries with the exception of those countries in which Canadian laws are tested. This statement was made in the House of Commons by Premier Mackenzie King, Russia, the prime minister, had enjoyed certain special diplomatic privileges which had been discontinued several years. The result of the discontinuance of these special privileges, Premier King said, was that relations with Russia, diplomatically, were on the same footing as with Austria, Italy and such countries. A "cane shoot" was made to go to Russia, the prime minister remarked, could secure his passport in Ottawa, and have it used by Russian authorities.

### Eastern Canada Interested

Ottawa Grain Growers Plan To Enter World Grain Show

Toronto, Ont. Eastern Canada grain growers have already started plans to enter the world grain show at Regina, still two years away. A few smattering prize lists which have found ways into agricultural centres here have resulted in a flood of requests for more and these requests are being communicated to the Regina promotion headquarters.

Seven of the leading grain growers of the world, who are the most consistent winners in Ontario competitions, recently declared at Stratford that they have already started developing seed for the world show. Middlewest farmers have also started organizing.

### New Fuel Oil Plan

Harford, Conn. A new device for an aeroplane engine which permits use of all grades of fuel oil has been successfully demonstrated by the Pratt and Whitney Aircraft Company. The device eliminates the usual carburetor system and uses the gas turbine engine by a new system of direct fuel injection.

### Duchess Takes Up Abandon

London, England. The Duchess of Bedford, who is 65 and an aviation enthusiast, met her first sea-bath in her own bath plane at her home, Wootton Abbey, Bedfordshire.

### Natural Resources Bill

First Reading Of Bill To Ratify Agreement With Saskatchewan

Ottawa.—The bill to ratify the agreement between the Dominion Government and the Government of Saskatchewan, transferring the unallocated natural resources of Saskatchewan to the provincial government, was introduced in the House of Commons recently and given first reading. The only difference between this agreement and the one made with Alberta, Hon. Charles Stewart, Minister of Interior, explained, was a clause providing for submission of certain questions to the courts. This litigation will not delay the transfer of the resources. They will be handed over as soon as the agreement is ratified by parliament and approved by the Imperial parliament.

### Says British Naval Policy Is Dangerous

London, England. Great Britain's war time first sea lord, Admiral Lord Wemyss, said recently that Great Britain's future as a maritime power was fraught with grave possibilities under the present naval policy and should be reviewed by the government.

Making the presidential address at the Institute of naval architects, Lord Wemyss pointed to the reduction of 16 per cent in the British naval estimates as compared to 1914 "in concert with an enormous increase in naval armaments."

"In this backbone of British industry and national defence," he asked, "to be sacrificed in order that the nation should be able to do so and persons shall be provided on a more magnificent scale than those who in many cases might be employed in development, the empire resources and helping to protect our interests overseas?"

"Let us hope that the reaction which must inevitably come sooner or later, toward fuller realization of our naval requirements may find itself in the hands of the nation's natural resources in men, money and materials are irretrievably lost through a policy of mistaken conservatism, extravagance and expenditure in unprofitable channels."

The suggestion was made in parliament recently that the admiralty should take advantage of the presence in London of Dominion naval delegates, to discuss the question of naval disarmament.

Following in Matthew Gopey by Hon. C. G. Munro, secretary to the admiralty, said the question is more appropriate for the Imperial conference.

If disarmament comes, Lancaster, who had raised the matter in the House of Commons, said he was not discussing the question was that the British Government had "punched" the contributions of those Dominion interested in the Singapore naval base, by announcing war had been shown down on this new declaration, saying anything about return of the money contributed. Mr. Munro did not reply to this.

"While all the self governing communities of the British Empire have an equal claim on the protective role of the navy, they take widely varying views of their obligations towards the cost of Imperial defence," remarked the Weekly Review, Truth, recently.

The statement was provoked by study of the memorandum on respective contributions of Great Britain and the Dominions, released by the first lord of the admiralty last week. This showed the expenditure per capita in Britain was \$5.96, in Canada, \$1.82, New Zealand, \$2.47, South Africa, 37 cents; South Africa (white only), 22 cents.

An even more striking manner of expressing these inequalities is that neither Canada nor South Africa think there is the faintest prospect of ever naval war, and that it is only wasting money to provide against it."

## Say Wheat Acreage Will Not Show Much Decrease This Year

### Tampering With Grain Scales Serious Offence

Is Punishment

Ottawa, Ont. Tampering with grain scales is a serious offence, punishable by imprisonment without the alternative of a fine. The term of incarceration is to be not less than six months. An amendment to this effect was passed in the agriculture committee of the House of Commons during consideration of the Grain Act.

The reading of the amendment is that any person, in control of grain scales, who is found guilty of tampering with the scales shall be liable for the term of imprisonment mentioned. The clause was originally drafted to permit the alternative of a fine, but several members of the committee were of the opinion that a fine would not meet the case. A number of important provisions were approved.

### Suggests Pensions For Blind

D. R. Lawley Advocates Aid For Those In Isolated Areas

Ottawa. Pensions for blind persons in isolated parts of the country were advocated before the Canadian Federation of the Blind by D. R. Lawley, travelling secretary in the organization.

There are 7,000 sightless persons in Canada, he said, the majority of whom live in isolated parts of the country. He said that the Federation of the Blind has been working for the past few years to get the government to take up the question of the blind in isolated areas.

He said that the Federation of the Blind has been working for the past few years to get the government to take up the question of the blind in isolated areas.

Winnipeg, Man. Average of wheat on the prairies of the west will not show a decrease this year, according to indications at present. This is the view of the Canadian Press. Spring rains, however, are characterized as a generally unfavourable picture of repelling depleted subsoil moisture.

Forecasters of ultimately decreased wheat areas in the west are not unfounded, nevertheless, by the opinions that acreage will remain about the same. It is considered all sides that weather during the remainder of April will advance necessary results after a cut in the average of territory needed to wheat.

While plans for acreage cuts have been made, according to the Saskatchewan wheat pool, which controls more than one-half of the province wheat yield and its harvest is expected to be a record, the wheat pool has made no such move to restrict sowing. Pool officials have gone no further than to advise a gradual sowing of land that is not at least in fair condition. They believe that this year farmers' land will be sown in fair condition. They are also in the language of the grain that immediately has given the province a record yield. President A. J. McPhail, of the pool, has stated that the question is one for the individual farmer to decide.

Two weeks of the United Farmers of Canada, Saskatchewan section, have passed. The section has been busy with the question of the wheat pool. The section has been busy with the question of the wheat pool. The section has been busy with the question of the wheat pool.

(187)  
A revelation of the wide range and high quality of manufactured products centering in the two cities of Port William and Port Arthur was demonstrated by the visitors to the "Home Industry Exhibition," held at the former city recently. The exhibit was open only to the fine manufacturers of the two cities and one hundred exhibits in the displays in which there was practically no duplication of products.

Forty years ago not a tree could be seen growing on extensive stretches of the virgin prairie in western Canada. Today trees are plentiful and there is hardly an established farm house but has its shelter belt or a grove of poplars, maples or some other variety of trees. Recent reports of inspectors of Canadian Government Forestry Service show that there are 7,500 farms thus provided and to date over 100 million trees have been distributed over the prairie, with many millions more bought from nurseries and planted on farms.

Alberta led the western provinces in the number of successful farm plantations made in 1935 by the Canada Colonization Association when a total of 427 families were settled on 50,000 acres. Said W. H. Dick, representative of land settlement for the province, at a meeting in Calgary recently.

## HONEY PRODUCTION

WOMEN OF THE 25 million pounds of honey annually produced in Canada, nearly one-third comes from the prairie provinces. In 1935 the output in these provinces was 8,154 pounds, of which Manitoba produced 2,899,000 pounds, from 26 provinces. Alberta 214,000 lbs. and 20,000 lbs. from the prairie provinces.

## HIGHLIGHTS FOR LUNCH

Guest: "Only once in history has the personality of a great singer inspired a great chef in the making of a masterpiece when we got the 'poco Melba'."

Flapper: "Oh, but I'm sure your wrong there. What about the master Pat?"

## THE BASSANO MAIL

Published Every Thursday  
Wallace J. Smith  
Editor and Publisher  
Subscription \$2.00 a year in Canada  
\$2.50 to the United States

Among other things to put the potter off his game right at the opening of the season is the demand from the federal government for an income tax return.

Perhaps the world wheat situation would be cleared up if people would lay off this diet business.

All the American tariff tinkers want is to protect their own interests while at the same time telling other countries how to run theirs.

This sugar beet business should be sweet news to the farmers.

The Chinese got a foothold in British Columbia by washing out socks, but now they are cleaning up in every line of business.

Holding on a cement floor is better exercise than golf, says an Ontario doctor. But it doesn't leave much room for the imagination.

Over at the naval conference in London they are having an awful fight for a peaceful settlement.

Another badly worn shirt found her high-back for disaster, and the grounds of mental cruelty. The man probably said her to a Easter hat was a fright.

## HOSPITAL TAX NOT EXCESSIVE

An increase of twenty per cent in Bassano Municipal Hospital taxes would cause no dissatisfaction among the taxpayers. Last year's rate was one and one-half mills and announcement that the rate this year would be three mills, the result of a deficit that occurred last year.

A hospital tax rate of three mills is a very reasonable rate. It is much lower than the rates paid in most other municipal hospital districts.

In dollars and cents the increase amounts to very little, and should not be cause for complaint. On last year's mill rate a one-acre section of land valued at \$20 an acre would be taxed \$200. This year, with a mill rate of three mills, the taxes will amount to \$200, an increase of \$100.

## MORE TREES FOR BASSANO

The appearance of Bassano is undergoing a gradual transformation. A few years ago the town was just a collection of buildings placed in rows on the bald headed prairie. Now many homes are surrounded by trees, lawns and lawns, and the streets are graced with rows of young trees which provide a welcome shade when they have reached their summer foliage. While most of the trees are still rather small, every year that is growing taller, their branches are spreading farther, and their symmetry and beauty is being enhanced. These trees make a wonderful improvement in the appearance of the town. They remove that bare harsh appearance, and their sheltered beauty adds a charm that only trees can give.

Bassano's program of planting more trees each year is to be continued this spring. The citizens have become "tree-conscious," and realizing the great value of trees, every year more trees are planted and the tree area enlarged.

This spring one thousand trees are to be planted. They will be placed in a long row on the north side of the town and some will also be planted on the streets to replace trees that have died. Next Tuesday, April 22, is the date set for this concerted tree-planting effort, and every citizen who can should lend his aid in this good work.

## A REST ROOM

Bassano has long been in need of a rest room for ladies, and now that need is to be supplied. Mr. A. P. Pierson is the man to thank for this boon, for in his new automobile service station, now under construction Mr. Pierson has made provision for a ladies' rest room.

This rest room will not be large or elaborately furnished, but even so it will be appreciated by many out-of-town ladies when they visit Bassano. Mr. Pierson's business hours are from early morning until late at night, and also Sundays and holidays, so the rest room will be nearly always open.

## Lawn Hose

50 foot lengths corrugated 1-2 inch hose, no kinking will last for years.

## HOUSE CLEANING

(Arthur Galtman)  
Good bye, battered desk, faithful writing desk, good-bye! She is giving you, I trust, to a worthy than I.

And is putting in your place a convenience from the shop. An efficient business desk with a fast and shiny top.

Good bye, battered desk? You were worth your weight in gold. For your dusty shelves could hold

All my documents so well that with hardly any air and your dusty shelves could hold

I could almost always tell pretty nearly where they were.

Good bye, battered desk? I shall miss you night and day. Your appearance has two sides and a pen and pencil tray.

And a lot of clever tricks, with a filing system too.

Which inspires me with awe, and I don't know what to do.

Good bye, battered desk? I shall mourn you late and long; You have played a noble part in the History of Song.

You had just the proper breadth to accommodate my scribbles, But on this unbounded waste shall I ever write at all?

Good bye, battered desk? He as happy as you can

In a world where Woman jeers at the constancy of Man.

To the shabby hat and coat and the blackened briar bowl,

Though he grips the true and tried with the fibres of his soul!

## PRAIRIE APPLES

Morden, Manitoba: After fifteen years of seed planting, the experimental work of the Canadian Government Department of Agriculture has developed sixteen varieties of apple trees suited to the climatic conditions of the prairie provinces. Horticultural experts point out, however, that it will take several more tree generations to evolve the ideal species. Fruit tree seeds are offered to prairie farmers by the government's experimental station at Morden for planting in their gardens.

## Snap-shots on the Farm

## Analyze the Allowance On Your Used Car

If a dealer pays you more than the true worth of the car he must make up the difference by extra charges on the new car or re-sell it to some one else at too high a price.

Permanent value is always better than a temporary bargain in the purchase of an automobile. It pays to look ahead and consider reliability and ultimate up-keep costs, as well as comfort, safety, speed, and beauty of line and color.

Since most automobiles are bought for replacement, the value set on your used car is a factor in almost every purchase. Frequently it is given an importance beyond its true worth.

Used cars have a definite market value and you are justly entitled to an allowance based on that value. It is not fair that you receive less. It is not to your best interests to receive more.

If a dealer pays you more than the true worth of the car he must either re-sell it to some one else at too high a price or make up the difference on the new car. This he cannot do unless he is allowed an excessive profit on the car or on financing, extra equipment and other charges. In either case you pay the bill, for no way has yet been found to give something for nothing. The money must come from somewhere.

It is good for you to have a true picture of the used car situation and its secondary importance in the purchase of an automobile.

You may not get the largest used car allowance from the Ford dealer, yet you gain in the long run. You save far more than the seeming difference in trade allowance because of the lower first cost of the Ford, the low charges for selling, financing and accessories, and the lower cost of operation, service and replacement parts. The profits of the Ford dealer are not marked up or increased to cover a high allowance on a used car.

Furthermore, at least \$75 extra value is given to you in the new Ford in the Triple's shatter-proof glass windshield, Rustless Steel, five steel-spoke wheels, and four Houdaille double-bearing hydraulic shock absorbers. The large number of belt and roller bearings, and the extensive use of the steel forgings instead of castings or stampings are other features that show the extra quality built into the Ford car.

## Local News

Wm. Hooty is doing grading work on some of the town streets.

Fred Holmes was home from London over the week-end. Mr. and Mrs. W. J. Blankenship were in Calgary on Sunday.

Mr. and Mrs. A. McKee have adopted a baby girl nine months old. A number of young folks attended a dance near Hussar last Friday evening.

J. F. Boyce left Wednesday for Red Deer where he will spend the Easter holidays.

A number of golfers were out on the links last Sunday and enjoyed the game even though the course is badly in need of improvement.

Wm. Buchanan motored up on Friday last Saturday evening, returning Sunday afternoon. Mrs. Buchanan is still in Bassano.

The Anglican card party and dance, which was to have been held Easter Monday, April 21, has been postponed indefinitely.

The Ladies' Aid of Knox Church will hold a tea in Currie & Milroy's store next Wednesday afternoon, April 23, at 3 o'clock.

G. H. Travis and Joe H. Donaldson attended a meeting of the P. A. M. in Strathmore last Thursday evening.

Next Tuesday, April 22, is free planning day. Citizens are asked to get out early in the morning and help put in trees.

Miss Mary Cathro, who has been attending normal school in Calgary, was home over the week-end. She is now doing practice teaching at Burn House school.

W. J. Blankenship, local manager of the Royal Bank of Canada, is being transferred to Northwold, Ontario, and will be manager of the bank there. Mr. Blankenship expects to leave with a couple of weeks. A. H. O'Keefe of Calgary, Saskatchewan, has been appointed the new manager of the Bassano branch.

ESTRAY—on the premises of E. A. McKenzie, Hunter, one bay horse with grey mane and tail, branded.

One black mare about 3 years old, branded G.L. One bay pony aged, branded X, collected.

FOR SALE—Milk cows; apply to Smith & Ellis, Latham, Alta.

FOR SALE—1929 Chevrolet sedan, dining room suite, chestfield; sundry small pieces of furniture.

W. J. BLANKENSHIP, phone 73 Bassano.

## 1932 World's Grain Show In Regina

A Few Notes on the Show

With a view of improving the quality of seed used, and to encourage exhibitors for the World's Grain Show at Regina in 1937, the British Columbia Department of Agriculture offers a grant of \$75 to farmers' associations of seed growers' associations under whose auspices a combined field crop and cleaned seed competition is organized, the grant to augment the prize money awarded on the competition.

The third entry in the competitive classes of the World's Grain Exhibition and Conference came to the office on April 3 from Albert J. Mason, Mr. Mason operates the acres in the Lostland, Bask. district. He won the grand championship for wheat at Saskatoon in 1923-14 and 1924, and has been in the winning lists at the Chicago International.

Speaking of the very generous cash prize offered at the World's Grain Show and referring especially to the first prize of \$2,500 in cash of the wheat classes, P. H. Reed, secretary of the Canadian Agricultural Exhibition, says: "The majority of these prizes should come to Alberta farmers. Wheat grown in Alberta is the best in Canada and its exhibition should be in the hands of the exhibitors themselves on or before March 1, 1937."

## Canada Is Fastest Growing Dominion

OTTAWA, April 16 (The Canadian Press)—The fastest growing country in the world, according to the latest statistics, is Canada. It is growing faster than any other country in the world, and its growth is being recognized by the world's leading governments and business leaders.

The colonial group came very close to Canada when the growth of exports and imports since the pre-war period was reviewed. Colonial production had increased three-fold since the war. Imperial preferences, he stated, would help in the development of the colonies, which as a group could become the biggest economic entity within the British Commonwealth.

## DRESSMAKING DEMONSTRATION

A three day course in dressmaking will be held at the "Hillside" Hall, Tuesday, Wednesday, and Thursday, April 29, 30, and May 1, under the auspices of the Women's Institute. Anyone wishing to take advantage of this course please phone Mrs. H. A. Holmes at 16.

## HEALTH SERVICE

of the CANADIAN MEDICAL ASSN.

DRINKING FOR HEALTH

The body of the average person contains about seventy per cent of water. It is important, therefore, that the individual see to it that a sufficient amount of water is supplied to his body.

It is not possible to say just how much water a person should use because the amount varies, depending upon his occupation and the heat and moisture of the atmosphere in which he lives and works. Working out of doors on a hot day, a man gets rid of a considerable quantity of water by the evaporation of water from the skin.

Generally speaking, most people do not secure a sufficient amount of water; either they do not drink enough water or other fluids, or they do not eat sufficiently of foods containing a high percentage of water. Water is usually so easily and readily obtained that it is not generally appreciated. We are apt to think of it only at those times when we are thirsty and there is none available. It is likely that many persons who now enjoy health would feel even better if they were to increase their fluid intake by developing the habit of drinking a glass or two of water before breakfast and between meals.

There is no objection to a moderate use of water with meals, but it is distinctly harmful to use water or any other beverage to wash down food. Drink should not be taken while food is in the mouth. Before drinking, any food that is in the mouth should be thoroughly masticated and swallowed.

Water acts as a food solvent. It is a most valuable aid in securing regular and complete elimination of body wastes. Water is also necessary for the regulation of body heat.

It is not sufficient to rely upon a sense of thirst as a guide. When thirst occurs, it should be quenched, but it often happens that many persons are only occasionally thirsty. For years they have not attended to the natural demand for water unless it were pressing, and so their sense of thirst is blunted. A daily water-drinking routine should be adopted, regardless of the absence of thirst.

Like all good things, abuse may do harm. If six glasses of water a day are good, it does not follow that eighteen are three times better. Excess is never desirable, and in those who suffer from a heart or kidney condition, excessive drinking of water may be definitely harmful.

No rule of hygiene is easier to obey than that of drinking sufficient water. There is no reason to overlook its regular practice.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

## McCORMICK - DEERING Power Lift Grain Drills

Every Seed at Uniform Depth  
when the McCORMICK-DEERING grain drill is used

Built for Horse or  
Tractor use.  
Every kernel placed just  
where it should be.  
Uniform seeding means  
uniform sprouting and  
better yields.

This big drill has made a wonderful name for itself in Western Canada. Its strong, well balanced construction, together with the famous front seed delivery double the boots, has made it the favorite with grain growers in every Western province. Farmers have found that front seed delivery is much more than a mere "talking point." When the soil is dry, and seeding conditions unfavorable, the front seed delivery boots will increase the yield from two to five bushels per acre. Farmers who have kept careful records have testified to these facts. Front seed delivery insures that every seed reaches the bottom of the furrow, where it can be covered evenly. There are no half-covered kernels, and no seed wasted on the top of the ground or among the coarse topsoil clods. The seeds drop in front of the disc bearing, and go right to the bottom of the furrow opened by the discs.
